

# Midtown Dental Laboratory CE Opportunity

## A CONTEMPORARY APPROACH TO PREDICTABLE ESTHETIC DENTURES

Eliminate the frustration, intimidation, and unpredictability often associated with removable restorations. Join the revolution of ideas, techniques, and materials that can immediately improve the quality, enjoyment, productivity, and profitability of removable prosthetic services in your practice.

This course will update basic removable procedures, concepts, and materials. Emphasis will be placed on edentulous anatomy, simplified impression procedures for complete and partial dentures, posterior denture occlusion, and the development of skills of communication between the clinician and the laboratory technician. See how denture processing systems differ and how important they can be to the health of the oral tissues.

### Learning Objectives:

- Significance of removable opportunities
- Anatomical interpretation of the edentulous cast
- Single entry final impression system, eliminating custom trays
- Quick, simple, reliable jaw registration technique without denture bases
- Tools that facilitate the communication between Dentist and Technician
- Lingualized occlusion, a timely concept and technique
- Denture processing with minimal dimensional changes
- Accudent Impression technique demonstration

### Donald Yancey, CDT

Mr. Yancey has been involved in the dental profession since 1973. He has gained a broad background in dentistry by working as a chair side assistant in the U.S. Navy, as a laboratory technician, and as the owner/operated of a highly specialized removable laboratory. Don is certified in Full Dentures and is presently the Prosthetic Specialist for Ivoclar Vivadent, Inc. in the Southeastern part of the United States and lectures extensively to Universities, Dentist, Dental Laboratories, National and State Dental Organizations.
